REC'D 2.1 MAR 2006

INTERNATIONAL PRELIMINARY REPORT ON PATENTABLE

PCT

(Chapter II of the Patent Cooperation Treaty)

(PCT Artcle 36 and Rule 70)

Applicant's or agent's file reference P03EB007PCT	FOR FURTHER ACTION	N	See Form PCT/IPEA/416			
International application No. PCT/KR2004/001509	International filing date(day/n 22 JUNE 2004 (22.06.2		Priority date (day/month/yea. 25 NOVEMBER 2003 (25.	r) 11.2003)		
International Patent Classification (IPC G01R 29/08(2006.01)i						
Applicant Electronics and Telecommun	ications Research Institu	ute et al				
This report is the international p Authority under Article 35 and	oreliminary examination report, transmitted to the applicant according	established by this lording to Article 36.	nternational Preliminary Exam	nining		
2. This REPORT consists of a total	al of3 sheets, inc	cluding this cover sh	eet.			
3. This report is also accompanied by ANNEXES, comprising: a. (sent to the applicant and to the International Bureau) a total ofsheets, as follows: sheets of the description, claims and/or drawings which have been amended and are the basis for this report and/or sheets containing rectifications authorized by this Authority (see Rule 70.16 and Section 607 of the Administrative Instructions).						
beyond the dis Supplemental b. (sent to the Internation	upersede earlier sheets, but whice closure in the international applications. Social Bureau only) a total of (indication and/or tables related the ence Listing (see Section 802 of the content of the c	icate type and numb	er of electronic carrier(s)) orm only, as indicated in the S			
	is relating to the following items the report	S:				
Box No. II Priority						
│						
	Box No. IV Lack of unity of invention Box No. V Reasoned statement under Article 35(2) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement					
1 2000						
Box No. VIII Certain	observations on the internation	al application				
Date of submission of the demand		Date of completion	of this report			
19 APRIL 2005	(19.04.2005)	27 FEBRU	JARY 2006 (27.02.2006)

INTERNATIONAL PRELIMINARY REPORT ON PATENTABILITY

International application No. PCT/KR2004/001509

Box	No. I	Basis of the report				
1.	With other	regard to the language, this report is based on the international application in the language in which it was filed, unless wise indicated under this item. This report is based on translations from the original language into the following language				
2.	With regard to the elements of the international application, this report is based on (replacement sheets which have been furnished to the receiving Office in response to an invitation under Article 14 are referred to in this reort as "originally filed" and are not annexed to this report): The international application as originally filed/furnished					
		the description: pagesas originally filed/furnished pages*received by this Authority on pages*received by this Authority on				
	 J	the claims: pages				
		the drawings: pages as originally filed/furnished pages* received by this Authority on pages* received by this Authority on the sequence listing and/or any related table(s) - see Supplemental Box Relating to Sequence Listing.				
3.		The amendments have resulted in the cancellation of: the description, pages the claims, Nos the drawings, sheets the sequence listing (specify): any table(s) related to sequence listing (specify):				
4.		This report has been established as if (some of) the amendments annexed to this report and listed below had not been made, since they have been considered to go beyond the description as filed, as indicated in the Supplemental Box (Rule 70.2(c)). the description, pages the claims, Nos. the drawings, sheets the sequence listing (specify): any table(s) related to sequence listing (specify):				
	• If iter	n 4 applies, some or all of those sheets may be marked "superseded."				

INTERNATIONAL PRELIMINARY REPORT ON PATENTABILITY

International application No.

PCT/KR2004/001509

Box No. V Reasoned statement under Article 35(2) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement

ı				
I	1. Statement			
I	Novelty (N)	Claims	1-9	YES
		Claims	none	NO
	Inventive step (IS)	Claims	1-9	YES
		Claims	none	NO
	Industrial applicability (IA)	Claims	1-9	YES
		Claims	none	МО

2. Citations and explanations (Rule 70.7)

The following documents are refered to:

D1 JP 2003-57281 D2 KR 2003-0002957 D3 US 6,181,285B1 D4 US 5,237,283 A

D1 discloses a system and method of measuring radiation electromagnetic waves, to ensure a long distance between a sample under test and an electromagnetic wave measuring antenna for measuring electromagnetic waves, radiated from the sample in a anechoic chamber. The ratio anechoic chamber reflects electromagnetic waves radiated from a sample under test up from an installation area of the sample toward measuring positions on the floor surface, according to the radiating direction of the waves.

D2 discloses a method for testing the local SAR(Specific Absorption Rate) of a human body exposed to an electromagnetic field, wherein a specific node consisting an FDTD(Finite-Difference Time-Domain) cell is obtained. The values of the node, a local tissue mass, and a total of the local SARs are set as the initial values. Thereafter, the node mass of the FDTD cell is obtained.

D3 discloses a positioning equipment for antenna radiation pattern measurements with a piston rod particularly for shock absorbers and spring devices.

D4 discloses a device for measuring electromagnetic interference, which is of the type comprising a closed test cell the periphery of which is defined by an outer conductor of a TEM waveguide constituted by a tubular casing.

The application also discloses a method for measuring electromagnetic radiation pattern and gain however, claims 1 to 9 feature a step measuring DUT for 18 arrangements and the second step to estimate power density from the measured data, and those teachings are not disclosed in Ω^1 - Ω^4 .

Therefor the subject matter of present claims 1 to 9 differ from the prior arts, and this teaching is not rendered obviously from the prior arts.

Thus the novelty of the subject matter claimed can be acknowledged, and also the subject matter of the claim 1 to 31 appears to involve an inventive step in the sense of ART 33(3)PCT as well.

The industrial applicability of said subject-matters is self-evident.
